

LLV enters the World of Virtual Reality!

LLV students are partnering with Macquarie University to create learning experiences for pre-service teachers. This week our students spent time learning to use technology to record 'teachable moments' for university students preparing to enter the world of teaching.

Our keen group of Stage 4 and 5 students are utilising their passion for Drama, Film-making and Storytelling to perform short, open-ended scenarios to allow pre-service teachers to immerse themselves into the realities of 21st century classrooms. We had so much fun with the 360-degree camera!
